About me

In 1991, after completing my commercial training and a 5-month language study stay in Germany, I started my professional activity at Fiduciaria Mega SA in Chiasso. During my professional career and training at the Chiasso office, I was able to obtain the certificate of specialist in finance and accounting (1995) and then the diploma of specialist in finance and controlling (1999).

In 2001, after a 5-month language study stay in Australia, I continued my professional career at the Lugano branch as vice director and since 2011 at the Riva San Vitale branch as substitute director. My professional experience started at the Chiasso branch and developed in the fields of auditing, accounting law, national tax advice for natural persons and legal entities. At the Lugano branch, I was able to further deepen my knowledge in international tax law, company valuation, preparation of financial plans and budgets, while at the Riva San Vitale office I have been able to deal with issues related to real estate tax consulting in the management of important real estate projects and tax issues related to inheritance.
